Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to an apparatus and method of message compression for wireless communication devices class 455, subclasses 422, 72.
 - II. Claims 28-40, drawn to a method for synchronizing dictionaries for message compression, classified in class 455, subclass 502.
 - III. Claims 41-51, drawn to an apparatus for dictionary modules classified in class 704, subclass 10; class 715, subclass 532 and class 341, subclass 50.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I (claims 1-27) has separate utility such as providing wireless communications between a mobile station and a network station which comprises setup messages, codes, or request dictionary messages. The invention II (claims 28-40) has separate utility such as identifying a rollback initiating event at a station for synchronization utilizing species such as error-detecting code mismatch or timer expiration. See MPEP § 806.05(d).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
